

What is it?

Cloud POS uses Customer records to records all sales regardless of payment method.

What can it do?

When a customer places an order, hungree.me matches contact details and records the sale against their record in Cloud POS.

Useful information

Customers and Accounts are related – but a Customer can exist without an Account record.

**Required Information**

All highlighted fields are needed in order for a Customer.

ID Unique Identification number assigned to this customer for your venue.

Name / Address Complete the full name, address, state and postcode. This is used for matching the customer in hungree.me.

Tel A telephone number for the customer.

Mobile A mobile number for the customer.

Email An email address for the customer.

**Loyalty Points**

If enabled for your venue, contains the running total of loyalty points and redemptions for a Customer.

KEY ACTION: hungree.me will create customer records if they do not already exist. Or, it will query Cloud POS and seek to match the name, email address and mobile phone number to confirm a hard match for a customer. If not found, then hungree.me will create a customer record when the sale is finalised.

INFORMATION: When processing a sale, if no matching Customer Record is found, then hungree.me will create one.
