

What is it?

Cloud POS is the source-of-truth for all product information. Setting details correctly here means that they are accurate in hungree.me

What can it do?

Add and update all products, set additional information required by hungree.me, including multiple price levels.

Useful information

You can set multiple price levels for products depending on unit of measure.

Required Information
This guide shows the **Pricing** tab. There are other guides for the **Profile** and the **E-Commerce** tabs.

→ **PLU** Unique code for this product; usually generated automatically

→ **Description** Short description of the product.

→ **Unit of Sale** Enter the unit of measure for a sale for each price level. This will typically be "EA" for fixed quantity or "KG" for products sold by weight or volume.

→ **Volume** Required if there is a Unit of Sale entry for products sold by weight or volume.

→ **Quantity** The standard quantity associated with the Unit of Sale

→ **Ex. Price** Item price for one Unit of Sale exclusive of Tax.

→ **TAX Description** Select the tax treatment for the product – GST or non taxable.

→ **KEY ACTION:** All highlighted fields must be supplied. Remember to select 'Save' to update the product information.

INFORMATION: The **Profile** and **E-Commerce** tabs also need to be completed. Refer to separate guides for these tabs.

INFORMATION: After information on a product is updated in Cloud POS you will need to reimport product details or refresh pricing in hungree.me. Refer to the Item Management reference guide for steps.

What is it?

Cloud POS is the source-of-truth for all product information. Setting details correctly here means that they are accurate in hungree.me

What can it do?

The Profile tab contains additional information needed for the hungree.me import.

Useful information

Loyalty Points and Bonus are not activated for all venues. Contact CloudHQ4 for more information.
